to be paid this period

$$G_t - T_t$$
$$+ i_{t-1} B_{t-1} + e_t \, i^f_{t-1} B^f_{t-1}$$

deficit plus interest

consolidated government:
Treasury + central bank

=

borrow in own currency ΔB_t

someone must buy: the cost is the interest rate

Russia 1998: rouble bond yields above 200%

+

borrow in foreign currency $e_t \, \Delta B^f_t$

foreign currency must be earned or borrowed

Sri Lanka 2022: reserves for 1.2 months of imports

+

a peg: printing money sells reserves

issue money ΔH_t

someone must hold it: the cost is inflation

Ming, Weimar, Zimbabwe: nobody would hold it
